Subject: Please voice your concerns about Raytheon's direct involvement with Aberfoyle Park High School

Dear friends,

We in Women's International League for Peace and Freedom (WILPF) are very concerned about the implications of the "partnership" which the weapons manufacturer Raytheon has been allowed to set up with Aberfoyle Park High School, a government secondary school in South Australia.

Attached and also copied below is the text of a letter concerning this "partnership", and giving more information about it. The letter has been sent this week to the South Australian Minister for Education on behalf of WILPF.

We in WILPF think that it is important to communicate to the South Australian government that the policy direction that they are taking on Raytheon's involvement with this school's curriculum and funding is a mistake.

We encourage other peace and women's groups to write to the Minister to voice your concerns. Individuals are likewise encouraged to write your own letter to the Minister on this matter.

With thanks,

Cathy
